## Potential tasks for Data & Eval Committee (brainstorm ideas)

- Catalog a list of data sources.
- Learning collaborative for people working in suicide prevention who are working in data, best practice, gap identification.
- Score Card—assess how we are doing to get aligned with national standards of suicide prevention data. Focus on how to improve this.
- Improving the data literacy and competency of people across the state.
- Build the capacity of the field to be more data driven.

- Data coordination—what metrics are most important to collect on a local level and how do we feed these into the larger scheme of things. Review the data dashboard on a routine basis.
- Who holds the task of providing data sources and the data dashboard for us to review.
- Think tank brain trust for individual research presentations.
- What are the universe of data metrics? How does this connect - protective and risk factors.
- We review the data, understand the strengths and gaps, a forum for learning and supporting each other who are doing in research.
